### EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. James Inskeep (Reg. No. 33,910) on September 01, 2005.

The application has been amended as follows:

Claims 25 and 32 have been amended.

25. A system for regulating an irrigation system comprising:

an environmental sensor control assembly having at least one environmental sensor and a [computer logic] microprocessor device;

said microprocessor device having a watering suspension routine;

said watering suspension routine receiving signals from said at least one environmental sensor for determining whether to suspend watering of said irrigation system based on said signals;

said watering suspension routine receiving manual inputs from a user setting a maximum and a minimum period within which said routine can suspend watering of said irrigation system in response to said signals;

said environmental sensor control assembly being a separate and distinct unit from, and connectable to, an existing stand-alone central controller of said irrigation system.

32. A method of regulating an irrigation system comprising:

manually inputting a minimum and maximum irrigation suspension time into an environmental sensor control assembly.

generating at least one environmental signal based on the sensing of an environmental condition with at least one environmental sensor;

determining whether irrigation should be suspended based on said at least one environmental signal;

generating an irrigation suspension signal using said sensor control assembly;

communicating said irrigation suspension signal to a preexisting stand-alone controller of said irrigation system, said stand-alone controller being separate and distinct from said sensor control assembly;

causing said preexisting stand-alone controller to suspend irrigation for a period of time based on said minimum and maximum irrigation suspension times manually input into said sensor control assembly [independently selected by a user].

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jayprakash N. Gandhi whose telephone number is 571-272-3740. The examiner can normally be reached on 6:30-5:00 (Mon. - Thu.).
